3. Research meteorologist=yes; TV meteorologist=no.
4. For identification purposes only.
5. "yes" = peer-reviewed publications in climate science or related field. Based on search of academic databases, including Google Scholar.
6. Taken primarily from U.S. Senate Committee on Environment and Public Works report.  
Despite what Simpson calls "incomplete information", she states that "we must act on the recommendations of Gore and the IPCC because if we do not
7. reduce emissions of greenhouse gases and the climate models are right, the planet as we know it will in this century become unsustainable."
