

Dear Mr. Dantone: I have read the Boston Globe article "Child Abuse By Strangers Is Called Rare," and find the yellow highlighted part of the article misleading. 1. Fathers who molest their child and others ARE pedophiles. 2. Pedophiles who abuse only underage males will usually avoid sex with adult males, and adult males (homosexuals) who have sex with other adult males rarely have sex with pre pubertal males. The problem is the imprecise use of the term "homosexuals."
